About the Author

JEFFREY G. SHELDON is a partner in Cislo & Thomas LLP, with offices in Southern California and Incline Village, Nevada. He was the founding partner of Sheldon Mak & Anderson, PC, a leading West Coast intellectual property law firm with offices in Pasadena, California. Mr. Sheldon is a summa cum laude graduate of Loyola Law School. He has a Bachelor of Science degree in Chemical Engineering from the Carnegie Institute of Technology, and a Master of Science degree in Biomedical Engineering from the University of Strathclyde, Glasgow, Scotland. His studies in Scotland resulted from receiving the Marshall Scholarship from the United Kingdom government.

Mr. Sheldon has been litigating patents and prosecuting patent applications since 1975. He has been adjunct professor in intellectual property law and patent law at Southwestern University Law School and advanced patent law at Loyola University, both in Los Angeles. He is a frequent lecturer for the Practising Law Institute and other organizations. He is a member of the American Bar Association and the American Intellectual Property Law Association and was chairman of the Los Angeles Intellectual Property Law Association. Mr. Sheldon is a frequent author and was a columnist for the *Los Angeles Daily Journal* on intellectual property law. He has been the author of the *Federal Circuit Yearbook: Patent Law Developments in the Federal Circuit* (PLI). He is a past chairman of the Intellectual Property Law Section of the State Bar of California and was identified by *California Lawyer* magazine as one of the top patent lawyers in the state of California. *Best Lawyers* named him Best Patent Lawyer for 2012 for the Los Angeles area, an award determined by his peers.

Mr. Sheldon has been responsible for the training of many patent practitioners and has been requested by many in-house patent counsel to prepare and prosecute their more challenging patent applications.

§ 9:2 Satisfying the Description Requirement of § 112 9-9
§ 9:3 Satisfying the Enablement Requirement of § 112..... 9-17
 § 9:3.1 What Is the Enablement Requirement? 9-17
 § 9:3.2 Guidelines for Satisfying the Enablement Requirement..... 9-18
 [A] The Enablement Requirement Applies Only to Claimed Subject Matter 9-18
 [B] The Specification Need Be Enabling Only to Someone Skilled in the Relevant Art..... 9-19
 [C] The “Skill of the Art” Is Determined As of the Date of Filing..... 9-21
 [D] The Specification Need Not Explain How or Why the Invention Works..... 9-21
 [E] Undue Experimentation Must Not Be Required to Reproduce the Invention 9-22
 [F] The Claimed Matter Must Not Be Unduly Broad in Relation to the Disclosure..... 9-24
 [G] The Specification Must Teach How to Make and Use Each Member of a *Markush* Group 9-26
 [H] Working and Prophetic Examples Can Be Used to Satisfy the Enablement Requirement..... 9-27
 [I] The Enablement Requirement Does Not Extend to Technology That Arises After the Time of Filing..... 9-27
 [J] How-To-Use Aspect of Enablement Requirement Requires Satisfaction of Utility Requirement..... 9-28

§ 9:4.1	What Is the “Best Mode” Requirement?	9-28
§ 9:4.2	Guidelines for Satisfying the “Best Mode” Requirement.....	9-30
[A]	The “Best Mode” Requirement Applies Only to Claimed Subject Matter and Unclaimed Elements Necessary for Operation of the Invention	9-30
[B]	Only the Best Mode As of the Filing Date Need Be Disclosed	9-32
[C]	The Best Mode Is Not Necessarily the Eventual Commercial Method.....	9-32
[D]	The Specification Need Only Disclose What the Inventor Subjectively Believes to Be the Best Mode.....	9-33
[E]	Violation of the “Best Mode” Standard Can Be Accidental	9-33
[F]	The Best Mode Must Be Disclosed Even If the Applicant Did Not Invent It.....	9-33

Acknowledgments

This book would not have been written without the help and encouragement of many. I wish first to thank my partners, Danton Mak and Denton Anderson, for allowing me the time to devote to this undertaking.

Special thanks to Ashok Janah, my law clerk, who contributed mightily to many of the chapters. Thanks to my dependable and hard-working secretary, Marilyn Paik. Also, thanks to the attorneys of Sheldon & Mak who took time to review the drafts of the chapters, in particular Denton Anderson and Stephen Seccombe.

I also give my thanks to those attorneys who offered their expertise in preparing the “specialist” chapters, namely Terrance Meador for the chapters on computer software and mathematically based applications, Stephen Seccombe for electrical applications, Edith Rice for chemical applications, SaraLynn Mandel for the biotechnology chapter, and Timothy Richardson for the chapter on preparing foreign patent applications based on a U.S. application.

I am also indebted to Richard Siebel and John Grinnel, the two patent attorneys who many years ago took the time to teach me how to write a competent patent application.

Last, but not least, I give my special gratitude to my wife Pamela, and to my four daughters, who gave up their father for many long nights and weekends so that this book could be finished.
